MEMORANDUM FOR: Director of Personnel

FROM: ██████████████████
                 Chief, Central Cover Staff   25X1A

VIA: Deputy Director for Operations
                 Deputy Director for Administration

SUBJECT: CENCO Interface with PERSIGN

REFERENCES: A. ODP/█████████████ Memo, 18 Aug 76 to   25X1A
                 ███████████ CCS/CENCO; "MAINID"   25X1A

              B. ODP/AD/███████████████ Memo, 20 Apr 77   25X1A
                 to ██████████████ PERSIGN-I Project   25X1A
                 Leader; "CENCO Interface with PERSIGN-I"

     1. The intent of this memorandum is to ensure our
mutual agreement on several issues concerning the
sharing and accessing of information contained in the
CENCO, PERSIGN-I, and PERSIGN-II systems. Your
coordination and/or comments are requested.

     2. Project CENCO is scheduled to become operational
in September 1977. Current indications are that the
CENCO system will reside on a data base separate from
HRSMCS applications. After an initial acceptance period
in which CENCO and MINI-CENCO will be run in parallel,
the MINI-CENCO portion of the HRSMCS data base will be
deleted. At that time, CENCO must be prepared to maintain
a minimal interface with PERSIGN-I. Resulting from
discussions which have already taken place between ODP and
CCS, it is, therefore, suggested that:

         a. until CCS acceptance of the CENCO system
     occurs, the current CCS access to PERSIGN-I data
     will be maintained;

         b. from the time of CENCO acceptance until
     PERSIGN-II becomes operational, the following
     CENCO/PERSIGN-I access will occur:

             (1) Selected CCS personnel will be permitted
         the on-line access to PERSIGN-I currently in effect.

E2 IMPDET

(2) CENCO will be permitted to maintain its own MAINID file, as outlined in the referenced memorandum on "CENCO Interface with PERSIGN-I" (Tab B). Batch access to PERSIGN data will continue.

(3) (Modifications may, of course, become necessary.)

3. The exact nature and details of the requirements for interface between CENCO and PERSIGN-II will require further study to determine details of policy, procedure, and methods acceptable to CCS and OP. However, concurrent with operational PERSIGN-II, the following CENCO/PERSIGN-II access guidelines will apply:

a. PERSIGN will be permitted to maintain in its data base the current cover information outlined in the referenced memorandum on MAINID (Tab A) and in subsequent discussions. These items are:
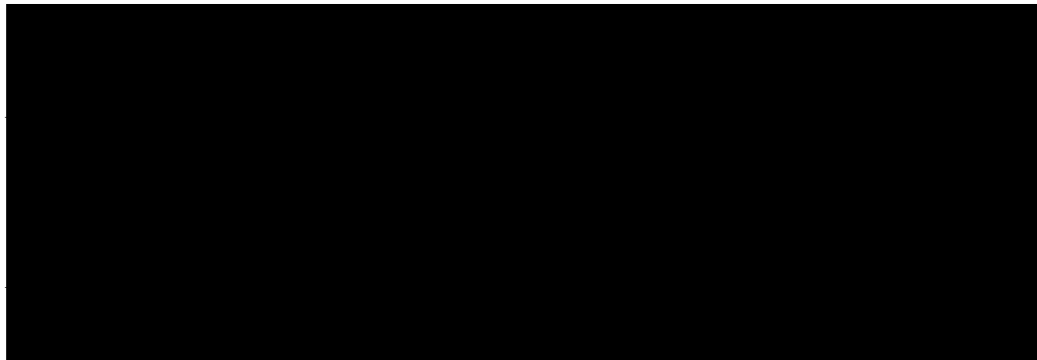

25X1C

These data items will be passed from CENCO to PERSIGN-II in a computer-readable format to be determined.

b. Selected CCS personnel will be permitted on-line access to PERSIGN-II data which parallels their current access to PERSIGN-I data.

c. CENCO will be permitted to maintain its own MAINID file of PERSIGN-II data using guidelines similar to those outlined in paragraph 2b above.

4. The items in paragraph 3 above are designed to lay a mutually acceptable minimum groundwork for interrelations between CENCO and PERSIGN-II/HRSMCS. We suggest that we reach this fundamental understanding now in order to lay a

-2-

basis for the discussion and solution of other matters involved in the planned interface. Among those we list:

    a. An agreement on methods and policies for determination of <u>Name of Record</u> to be carried in all systems.

    b. An agreement on a PERSIGN field for immediate block/unblock of cover status to be maintained directly from CCS.

    c. Possible future enlargements of data provided by PERSIGN to CENCO or by CENCO to PERSIGN to facilitate automatic interfaces and to eliminate the use of forms and papers.

    d. Agreements on the handling in both systems of working spouses and other employees hired overseas.

    e. Agency-wide agreements on the methods and safeguards to be employed for those systems which must work in true name.

25X1A

MEMORANDUM FOR: ███████████████████
PERSIGN-I Project Leader

FROM   : ███████████████████   25X1A
CENCO Project Leader

SUBJECT   : CENCO Interface with PERSIGN-I

1.   Project CENCO, a GIM-II system for the
Central Cover Staff/DDO, is scheduled to become
operational in September 1977.   This system will
replace an existing system, MINI-CENCO, which is
contained within the HRSMCS data base.   Although
the CENCO system will reside on a data base separate
from HRSMCS, CENCO must provide on-line access to
several data elements which are currently available
only from PERSIGN-I data-lists. These data elements
are:

PERSSNOR
PERAFF
PERAORG
PERDOB
PERGR
PERNAMEOR
PERNTY
PERORGCODE
PERSALARY
PERSCH
PERSERIAL
PERSFN
PERSTEP

2.   In order to provide CCS with the required data,
the CENCO system will include a MAINID data-list
containing the above data elements.   It is therefore
requested that:

a)   The CENCO project team be allowed
to extract the required data from
PERSIGN-I data-lists so that an
"initial load" of CENCO MAINID

may be accomplished.

b) The CENCO project team be allowed
   continuing retrieval access to the
   bi-weekly PERSIGN-I MINI-GAP
   transaction tape so that CENCO can
   keep its MAINID data-list sychronized
   with PERSIGN-I data.

3.   If these requests are acceptable, please   25X1A
sign and return this memorandum.

.18 August 1976

25X1A   MEMORANDUM FOR: ███████████

25X1A   FROM   : ███████████

SUBJECT   :   MAINID

     As we discussed on the telephone, one proposal being considered at this time is that Mainid in HRSMCS contain a record with a minimum amount of data for everyone who is or has been in the HRS systems with flags indicating which systems have an active record or a current interest. The individual projects would span to the Mainid for the last available data and PERSIGN would then only have to carry active personnel for a short time after they separated (probably through the W-2 cycle.)   25X1A

███████████████████████████████████

     The possible projects using the Mainid are:

PERSIGN	PERHOSP
CENBAD	CEMLOC
CAPER/OP	ATR (Training)
CIARDS	CENQUAL
PERINSUR	GAP (Archives-Personnel)

     One difficulty to be overcome is that some of the systems must deal with active employees in true name:

25X1A   ███████████████████████████

PERINSUR   —   Insurance claims are in true name

PERHOSP   —   Hospital claims again in true name   25X1A

███████████████████████████████████

     The data proposed as satisfying the requirements of these systems are:

|			
SSNOR	DOB	SEPREAS	NUMERIC ORG
NAMEOR	SEX	HQS	SCH/GR
ONAME3	AORG	AFF	
SFN	SEP or DEATH DATE	OCC SERIES	

By adding four more items the above systems would seldom if ever, have to span to PERSIGN:

| LCD | SD | CSEOD | 25X1C |
| SCD | | STATION | |

25X1A
